

DvTae White Paper

Institutional Rails for Tokenized Real-World Assets

Executive Summary

DvTae provides institutional-grade infrastructure for tokenized real-world assets, enabling crypto holders to access curated investment opportunities while maintaining crypto exposure.

Key Features

- â€¢ ERC-1400 compliant security tokens with transfer restrictions
- â€¢ Multi-sig custody and oracle-driven risk controls
- â€¢ AI-assisted peer-to-peer marketplace with price discovery
- â€¢ Streamlined KYC/AML compliance and institutional onboarding
- â€¢ Crypto collateral lending with 70-100% leverage

Market Opportunity

The tokenized RWA market is projected to reach \$10+ trillion by 2030, driven by institutional adoption and regulatory clarity.

Technology Stack

- â€¢ Smart contracts on Ethereum with Layer 2 scaling
- â€¢ Oracle integration for real-time risk assessment
- â€¢ AI-powered pricing models and liquidity provision
- â€¢ Compliance-first architecture with regulatory reporting

This is a simplified white paper for demonstration purposes. For detailed technical specifications and regulatory framework, please contact the DvTae team for the full document.
